

OnCore Medical Capabilities

OnCore's Three Key Value Components

OnCore Medical provides design, commercialization, production, fulfillment and repair services for medical device and analytical equipment companies worldwide. We understand that the products you produce address different patient-populations and so have unique cost and service level requirements. OnCore's Medical business unit will create a supply-chain that is optimized for each of your products to maximize your flexibility while managing the product's lifecycle complexities at a cost that improves your competitiveness.

Three Key Value Components

Elements of your custom solution:

- Medical-expert customer-focus-teams,
- ISO13485, FDA registered facilities,
- Single Quality system,
- OnCore's lean/six-sigma best practices,
- OnCore design and engineering
- OnCore global sourcing and supply-chain management of components to sub-assemblies
- Global footprint optimized for low-medium volume, high-mix product portfolios
- Innovation driven by strategic technical investments
- Long-term, win-win relationships.

Markets Served:

- Medical devices
- Home Health Care
- Analytical Equipment
- Disposables

Value Proposition:

These services combined into customer-specific solutions using the OnCore Production System, increase our customer's competitiveness while providing maximum flexibility; all managed to medical industry quality standards.

Global Operations:

- Springfield, MA
- Wilmington, MA
- San Jose, CA
- San Marcos, CA
- Tijuana, BC
